MAIN FINDING

Executive summary

This sample product file is not ready for a QR-ready passport preview. The product identity is mostly clear, but supplier evidence, material origin, packaging data, and end-of-life information are incomplete or missing. Before creating a passport-style preview, the brand should request additional supplier documentation and link evidence to the product file.

5 critical gaps found	5 supplier requests recommended	2 claims need evidence review
-----------------------	---------------------------------	-------------------------------

FIELD-BY-FIELD REVIEW

Product data gap review

Field	Status	Finding
Product name	EVIDENCE ATTACHED	Product name is available and can be used in the product file.
SKU / product identifier	EVIDENCE ATTACHED	SKU is present and can be linked to the review record.
Material composition	NEEDS REVIEW	Linen, wood, and foam are listed, but supporting supplier documentation is incomplete.
Material origin	MISSING	Country or region of origin for key materials is not documented.
Supplier declaration	NEEDS REVIEW	Declaration is referenced but not attached to the product file.
Packaging weight	MISSING	Packaging weight and packaging material breakdown are not available.
Care instructions	NEEDS REVIEW	Care guidance is present but not linked to evidence.
Repair guidance	DRAFT READY	Basic repair guidance can be drafted, but supplier confirmation is needed.
End-of-life guidance	MISSING	Recycling, disposal, or take-back guidance is not documented.
Product claims	NEEDS REVIEW	Any sustainability or durability claims should be supported by evidence before publication.

EVIDENCE TRAY

Supplier evidence review

ATTACHED

Product URL

Material composition note

Internal product description

REQUESTED

Supplier declaration

Material origin confirmation

Packaging weight data

Certificate file

End-of-life guidance

NEEDS REVIEW

Sustainability claim support

Repair guidance evidence

Care instruction source

Supplier evidence should be connected to the product file before the information is reused in a passport-style preview.

GAP LIST

Missing or incomplete fields

CRITICAL MISSING

- Material origin
- Packaging weight
- End-of-life guidance
- Supplier declaration attachment

NEEDS REVIEW

- Material composition evidence
- Product claim support
- Repair guidance
- Care instruction source

OPTIONAL LATER

- Additional supplier contact details
- Product lifecycle notes
- Internal review owner

NEXT ACTIONS

Recommended supplier requests

1	Confirm the country or region of origin for linen, wood, and foam components.
2	Provide the latest supplier declaration for the product or material batch.
3	Confirm packaging weight and packaging material breakdown.
4	Provide evidence supporting any sustainability, durability, repair, or recycling claims.
5	Confirm repair guidance and end-of-life handling instructions.

These requests are examples for this sample product file. Real supplier requests should be adapted to the product category and available evidence.

WHAT THIS MEANS

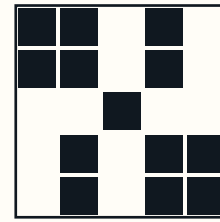

These gaps are not unusual. They show why DPP readiness should start with product-file review before creating QR-ready passport previews.

PREVIEW ONLY

QR-ready passport preview structure

PREVIEW STRUCTURE: DRAFT ONLY

- Product identity
- Materials and composition
- Supplier evidence
- Packaging information
- Care and repair guidance
- End-of-life information
- Evidence references
- Review status

PREVIEW ONLY

This is a passport-style preview structure for readiness review. It is not an official or certified Digital Product Passport.

ACTION

Recommended next step

The brand should not start with a QR page. It should first complete the product file by requesting missing supplier data, attaching evidence, and reviewing product claims. Once the product file is stronger, a QR-ready passport preview can be prepared with fewer gaps.

Check one product

Submit one product URL and see what supplier inputs, evidence, and product fields may be missing.
